- **Familiar:** Angular, TypeScript, SCSS, Bootstrap, Webflow, Figma, Adobe XD

PROFESSIONAL EXPERIENCE

GiantFocal | Indonesia (Remote)

Jr. Frontend Developer

July 2024 - Present

- Built and customized responsive themes for clients on HubSpot CMS.
- Developed reusable components using HTML, Tailwind CSS, JavaScript, and HUBL.
- Migrated an existing website to a custom HubSpot theme, improving integration and performance.

Xpress Super App | Makati

Jr. UI/UX Designer

August 2023 - July 2024

- Led the design for the Xpress Drivers Loyalty Program and contributed to the Xpress Super App design system.
- Designed mobile apps, websites, and admin systems using Adobe XD and Figma.
- Developed a CMS website using Webflow and built interactive prototypes from wireframes and mockups.

YouSource Inc. | Makati

UI/UX Engineer

October 2021 - April 2023

- Developed and maintained UI components, translating designs into functional code.
- Created interactive prototypes and sustained multiple projects in an agile environment.
- Led debugging and quality assurance for UI consistency across web and app platforms.

PROJECT WORK

Banking App | Developer | [Repo](#) | [Live](#)

2024

A React app for bank employees to manage accounts, processing withdrawals, deposits, and transfers manually.

- Built a dashboard displaying account details, including name, account number, email, and balance.
- Developed a transaction system for deposits, withdrawals, and transfers between accounts.
- Implemented an account creation feature and styled the interface using CSS.

Slack App | Developer | [Repo](#) | [Live](#)

2024

A React application where registered users are able to send and receive messages and create channels.

- Integrated an API to enable account creation, channel management, and messaging functionality.
- Developed a real-time messaging system where users can send, receive, and manage conversations.
- Built the application using React, allowing users to create channels and add members.

Stock App | Developer | [Repo](#) | [Live](#)

2024

A Ruby on Rails application where registered users can buy and sell stocks.

- Integrated Rapid API (Intra Day) for real-time stock data.
- Built a stock trading system in Ruby on Rails with Tailwind CSS for UI.
- Implemented authentication with Devise, including admin approval for new accounts via email notifications.
